

# TeslaScript Cheatsheet

## Basics

TeslaScript is a simple scripting language with Python-like and natural keywords.

## Variables

```
let x = 5
let message = "Hello"
let flag = true
```

## Printing

```
say "Hello, World!"
say x
```

## Functions

```
teach greet(name) {
    say "Hello " add name
}
```

## Function Call

```
greet("Niranjan")
```

## Expressions

```
let total = 5 add 10
let diff = 10 sub 3
let prod = 4 mul 2
let quotient = 20 div 5
```

## Fetch and Give

```
fetch "website.com"
give 5
```
